

## Customer Ordering & Stock Management System

### Phase 4: Process Automation (Admin)

---

#### 1) Validation Rule – Prevent creation of orders for unavailable stock

**Purpose:** Stop orders from being placed if stock is not available.

**Setup Steps:**

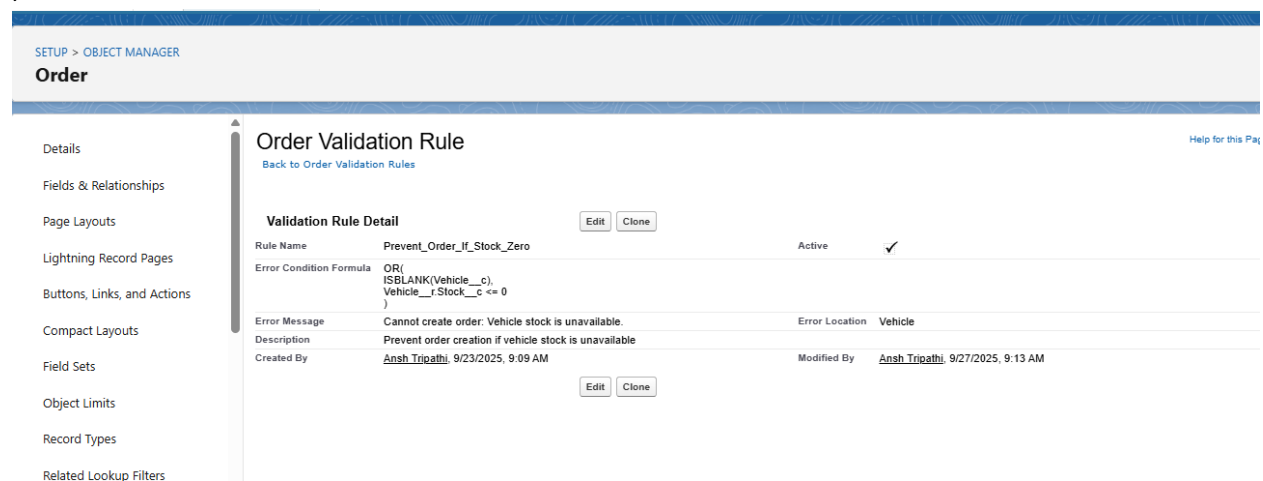

1. Setup → Object Manager → Order → Validation Rules → New.
2. Name: VR\_Prevent\_Order\_If\_NoStock.
3. Formula:

OR(

ISBLANK(Vehicle\_\_c),

Stock\_\_c <= 0

)

The screenshot shows the Salesforce 'Order Validation Rule' configuration page. The left sidebar contains navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The main content area is titled 'Order Validation Rule' and includes a 'Back to Order Validation Rules' link. Below the title is the 'Validation Rule Detail' section, which contains a table with the following information:

| Validation Rule Detail  |                                                              | Edit               |                                     | Clone         |                    |
|-------------------------|--------------------------------------------------------------|--------------------|-------------------------------------|---------------|--------------------|
| Rule Name               | Prevent_Order_If_Stock_Zero                                  | Active             | <input checked="" type="checkbox"/> |               |                    |
| Error Condition Formula | OR(<br>ISBLANK(Vehicle__c),<br>Vehicle__r.Stock__c <= 0<br>) |                    |                                     |               |                    |
| Error Message           | Cannot create order: Vehicle stock is unavailable.           | Error Location     | Vehicle                             |               |                    |
| Description             | Prevent order creation if vehicle stock is unavailable       |                    |                                     |               |                    |
| Created By              | Ansh.Tripathi                                                | 9/23/2025, 9:09 AM | Modified By                         | Ansh.Tripathi | 9/27/2025, 9:13 AM |

At the bottom of the 'Validation Rule Detail' section, there are 'Edit' and 'Clone' buttons.

4. Error Message: Cannot create order: Vehicle stock is unavailable. (Display on Vehicle field).
5. Save & Activate.

**Impact:** Prevents invalid orders, ensures customer only buys available vehicles.

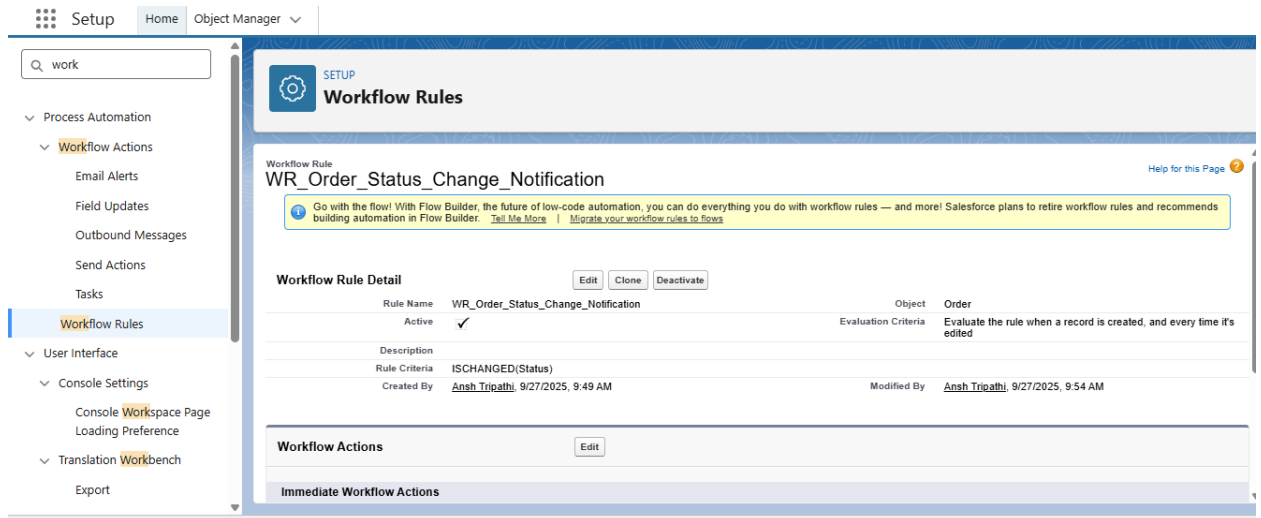

---

#### 2) Workflow Rule – Notify customers on status change

**Purpose:** Keep customers informed when their order status changes.

**Setup Steps:**

1. Setup → Workflow Rules → New → Object = Order.
2. Rule Criteria: ISCHANGED(Status\_\_c) → Evaluate when a record is created and every time it's edited.
3. Immediate Action → Email Alert.
  - Email Template: Order\_Status\_Change\_Notification.
  - Recipient: Customer Email (from Account or Contact lookup).
4. Save & Activate.

**Impact:** Customers always receive status updates automatically.

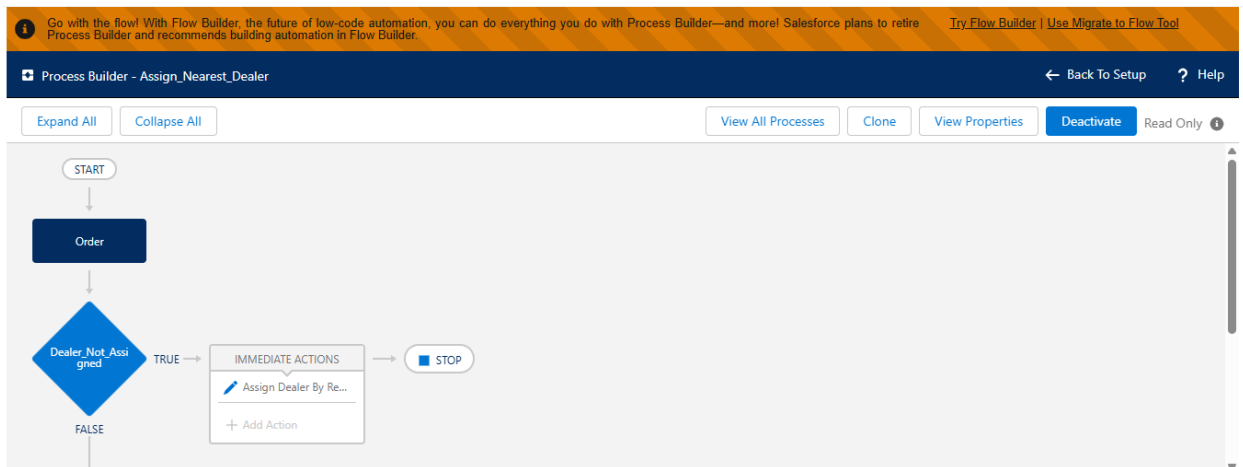

### 3) Process Builder – Auto-assign nearest dealer

**Purpose:** Assign order to nearest dealer based on customer address.

**Setup Steps:**

1. Setup → Process Builder → New Process → Object = Order.
2. Trigger: When record is created or edited.
3. Criteria: Always true.

4. Action: Update Records → Dealer\_\_c = [Formula/Custom Apex logic that finds nearest dealer].

- Example: Use a formula field for region mapping OR Apex for geolocation-based dealer search.

5. Save & Activate.

**Impact:** Orders automatically assigned, customers don't need to search for dealers.

---

#### 4) Approval Process – Bulk order approval

**Purpose:** Require manager approval for bulk orders.

**Setup Steps:**

1. Setup → Approval Processes → New Approval Process → Object = Order.
2. Entry Criteria: Quantity\_\_c > 5 (example threshold).
3. Step 1: Assigned Approver = Manager.

**Impact:** Prevents unauthorized large orders, ensures compliance.

---

## 5) Flow Builder

### a) Record-Triggered Flow – Auto-update status

**Purpose:** Keep order status in sync with stock.

#### Setup Steps:

1. Setup → Flows → New → Record-Triggered Flow.
  2. Object = Order.
  3. Trigger: When created or updated.
  4. Criteria:
    - If Stock\_\_c = 0 → Update Status to Pending.
    - If Stock\_\_c > 0 → Update Status to Confirmed.
  5. Save & Activate.
- 

### b) Scheduled Flow – Bulk order stock validation

**Purpose:** Auto-check stock for bulk orders every night.

#### Setup Steps:

1. Setup → Flows → New Flow → Scheduled-Triggered Flow.
2. Frequency: Daily | Time: 2:00 AM.
3. Get Records → Orders with Quantity\_\_c > 5 and Status\_\_c != Confirmed.
4. Loop through orders:
  - If Stock available → set Status = Confirmed.
  - Else → set Status = Pending.

## 5. Save as BulkOrder StockValidation & Activate.

The screenshot shows a workflow editor interface. On the right, a 'Set a Schedule' panel is open, displaying the following configuration:

- Start Date:** Sep 11, 2025
- Start Time:** 2:00 AM
- Frequency:** Daily

The main workflow area on the left contains the following steps:

- Start** (Trigger: Thu, Sep 11, 2025, 2:00:00 AM, Daily)
- BulkOrder StockValidation** (Action: Get Records)
- stock available** (Decision)
- stock available** (Path: stock available) → **update Stock** (Action: Update Records)
- no order** (Path: no order) → **End** (Terminator)

## 6) Email Alerts – Order confirmation

**Purpose:** Auto-send confirmation email when order is confirmed.

### Setup Steps:

1. Create Lightning Email Template → Order\_Confirmation\_Email.

The screenshot shows the 'Email Alerts' setup page in Salesforce. The left sidebar contains a search bar and navigation links for 'Process Automation' and 'Workflow Actions'. The main content area is titled 'Email Alerts' and includes a table of existing email alerts.

| Action                                     | Description ↑            | Email Template Name                              | Object | Last Modified Date |
|--------------------------------------------|--------------------------|--------------------------------------------------|--------|--------------------|
| <a href="#">Edit</a>   <a href="#">Del</a> | EA_OrderConfirmation     | Order Confirmation Email                         | Order  | 9/27/2025          |
| <a href="#">Edit</a>   <a href="#">Del</a> | EA_OrderStatusChange     | Order Status Notification                        | Order  | 9/27/2025          |
| <a href="#">Edit</a>   <a href="#">Del</a> | Order Confirmation Alert | Scheduled Service Appointment Confirmation Email | Order  | 9/25/2025          |

2. Setup → Email Alerts → New.

- Name: EA\_OrderConfirmation.
- Object: Order.

- Template: Order\_Confirmation\_Email.
  - Recipients: Customer (lookup).
3. Trigger from Flow or Workflow Rule when Status = Confirmed.

**SETUP**

This alert is currently not used by any rules

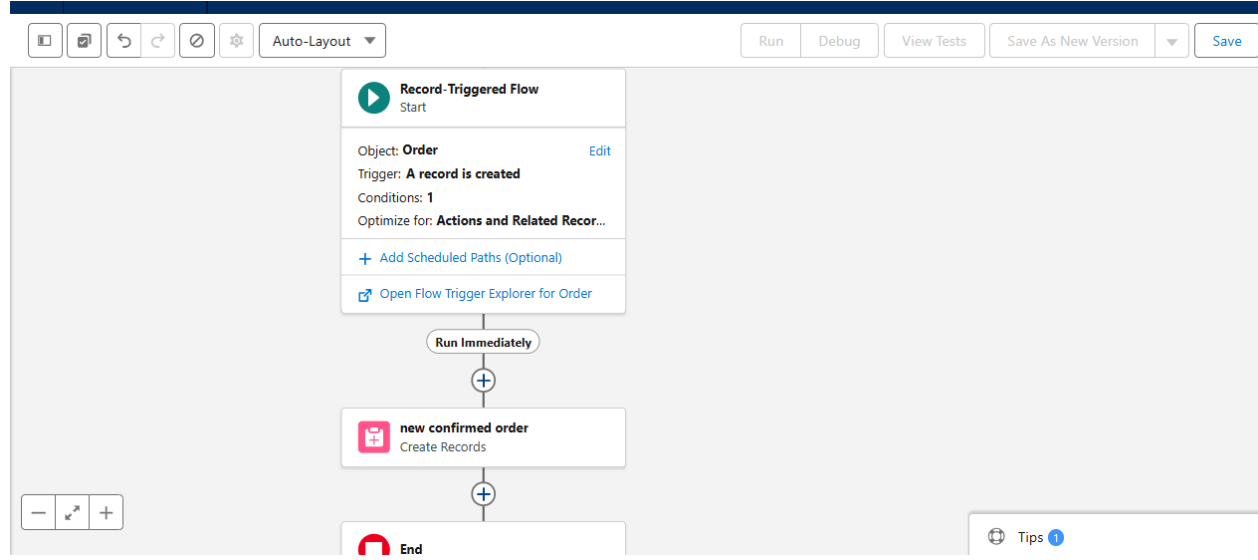

## 7) Tasks – Assign follow-up actions to sales agents

**Purpose:** Sales reps are reminded to follow up on orders.

### Setup Steps:

1. Setup → Flows → Record-Triggered Flow on Order.
2. Trigger: When Status = Confirmed.
3. Action: Create Task.
  - Subject: Follow up on new confirmed order.
  - Owner: Order Owner.
  - WhatId = Order Id.
  - Whold = Customer Contact.
  - Due Date = Today + 2 days.

- Priority: High.

## 7) Custom Notifications – Alert dealers of new orders

**Purpose:** Push real-time alerts to dealers.

### Setup Steps:

1. Setup → Notification Builder → Notification Types → New.
  - Label: New Order Alert.
  - API Name: New\_Order\_Alert.
  - Channels: Desktop, Mobile, In-App.

The screenshot shows the Salesforce Setup page for Custom Notifications. The left sidebar has a search bar with 'custom noti' and a list of items including 'Notification Builder' and 'Custom Notifications'. The main content area has a 'Custom Notifications' header with a 'SETUP' button. Below this is a warning message about privacy and security. The 'Custom Notification Types' section includes a 'New' button and a table of notification types.

| NOTIFICATION NAME                  | API NAME                           | NAMESPACE | DESKTOP | MOBILE |
|------------------------------------|------------------------------------|-----------|---------|--------|
| enablement_coaching_feedback_ready | enablement_coaching_feedback_ready |           | ✓       | ▼      |
| New_Order_Alert                    | New_Order_Alert                    |           | ✓       | ✓      |
